➔We've got to get moving - the science is clear, a future run on fossil fuels is no future at all.

To the House of Representatives,

I want to see a rapid transition away from fossil fuels to a renewable, clean energy future. I want you to start moving NOW in order to stop climate change in time to prevent a dangerous future not just for ourselves, but for our children and grandchildren.

I am calling on all Members of Parliament, regardless of their political party, as well as local councils - "don't be a fossil fool, get moving now!"

I'm asking our Members of Parliament to:

- ➔ Put in place an immediate *10-year freeze on all new coal* mining in NZ.
- ➔ Expand the current 90% renewable electricity by 2025 target to a target of *100% renewable energy* (including transport and other uses) by 2050.
- ➔ Create an accompanying *action plan*, including interim targets every 5 years to make sure we stay on track.

At the same time I am asking Members of Parliament and local councils to:

- ➔ *Prioritise public transport, pedestrian and cycling solutions* instead of continuing to increase the capacity for private.
- ➔ Support research and development for a *zero-carbon private transport system.*

I'm asking our local councils to:

- ➔ *Support a solar hot water loan programme* to make it more affordable for New Zealanders to install solar hot water systems.
